

Fisherman's Knot

This knot is particularly useful for tying fishing lines together.

Fixing Knots

Fixing knots are those knots which are best suited to fixing a rope to a pole or object. The Clove Hitch and the Round Turn and two half hitches are the main knots used for fixing. The Marlinespike Hitch is used for attaching the rungs to a rope ladder. When you need to drag a log or start a diagonal lashing you use the Timber Hitch. The Highwayman's Hitch is a fun knot which can be used to fix a rope to a branch so as to climb up or

down a tree. The beauty of this knot is that it can be removed, from the ground, by pulling on the slip loop. The fixing knots are:-

The Clove Hitch

The Round Turn and two half hitches

The Highwayman's Hitch

The Marlinespike Hitch

The Timber Hitch

Clove Hitch

The Clove Hitch is always used for fixing to a pole when starting a lashing

The Clove Hitch can also be tied using two loops which are passed over the top of a pole.
