

Sheer Lashing

*Sheer legs
lashing with
frapping*

Joining poles - no frapping

The sheer lashing is used to join two poles together to create sheer legs when the butt of the poles are spread apart and to create a long pole and keep them parallel. In the case of joining poles two

lashings are required, one at each end of the overlapping poles. Start with and finish with a Clove Hitch. Wrap and frap as shown. In the case of sheer legs one lashing is required.

Tripod or Figure of Eight Lashing

Traditional Tripod lashing

Danish Tripod lashing

Tourniquet Lashing

The tourniquet lashing is a quick and easy lashing to create. It is created using a closed loop of rope (heavier than normal lashing rope) placed around the poles. A piece of stick is then placed through the loop and twisted until tight. The stick is then secured to one of the poles with a piece of string
